Re: Application for an Exception to  
Order No. R-553 as it Applies to  
the Flaring of Gas on The Atlantic  
Refining Company's State "AK" Lease,  
Eumont Pool, Lea County, New Mexico

Gentlemen:

Application is herewith submitted for administrative approval for the temporary flaring of gas on The Atlantic Refining Company's State "AK" lease, comprising Lots 9 through 16 and the SW/4 of Section 3, T-21-S, R-35-E, Eumont Pool, Lea County, New Mexico and consisting of 480 acres, more or less. In connection with this application the following information is offered:

1. The Atlantic Refining Company is the operator of Well No. 1 on its State "AK" lease, completed in the Seven Rivers formation on August 3, 1956 and within the horizontal limits or within one mile of the horizontal limits of the Eumont Pool.
2. The latest available gas-oil ratio test of the State "AK" No. 1 Well, taken October 4, 1956, indicates a daily production of 44 BO and a gas-oil ratio of 1332 cubic feet per barrel of oil. Based on a normal unit allowable of 39 BOED, approximately 52 MCF of gas per day will be flared.
3. Negotiations are under way between the Phillips Petroleum Company and The Atlantic Refining Company for sale of this gas. Phillips has announced that it is their intention to begin taking gas from this lease by November 1, 1956, but that because of the uncertainty of their pipe supply and other difficulties they cannot be firmly committed to that date.
4. The Atlantic Refining Company has filed a Form C-110 showing the present disposition of gas and after connection is made will file such form again.

\_\_\_\_\_

5. The State "AK" No. 1 well is capable of producing top oil allowable for the Eumont Pool, and if closed in to prevent flaring of gas, will fail to recover all of the recoverable oil under its proration unit. It is Atlantic's opinion that correlative rights and the best interests of conservation will not be protected if this well does not produce.

Respectfully submitted,

THE ATLANTIC REFINING COMPANY
