OIL CONSERVATION COMMISSION.
Santa Fe, New Mexico.

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as Wilson
Oil Company Shell State No. 1399 Well No. 7 in SE 1/4

Company or Operator West Eunice Lease Lea County Lea
of Sec. 7, T. 21, R. 35, N. M. P. M., West Eunice Field, Lea County

The well is 1980 feet (N.) (S.) of the N line and 3300 feet
(E.) (W.) of the E line of Sec. 7 Twp. 21 S. R. 35 E.

(Give location from section or other legal subdivision lines. Cross out wrong directions)

If state land the oil and gas lease is No. B 1399, Assignment No. _____

If patented land the owner is _____

Address _____

If government land the permittee is _____

Address _____

The lessee is Shell Oil Company, Inc.

Address Midland, Texas

AREA 640 ACRES
LOCATE WELL CORRECTLY

We propose to drill well with drilling equipment as follows: Cable tools

We own and operate our own tools.

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: Bond for \$10,000 filed and approved.

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
18"	15 1/2"	55	Second Hand	112'	Cemented	150
15"	12 1/2"	45	" "	730'	Landed	
12"	10"	40	" "	1330'	"	
10"	8 5/8"	32	" "	2880'	"	
8"	7"	20	New	3600'	Cemented	200

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil and gas sand should occur at a depth of about 3700 feet.

Additional information:

Approved _____, 1940
except as follows:

Sincerely yours,

Wilson Oil Company

Company or Operator

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and putting them into practice. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas for improvement.
