

MEXICO OIL CONSERVATION COMMISSION
~~Santa Fe, New Mexico~~ **MISSION**
, N. M.

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

1. The first part of the report, which is the most important, is the description of the situation in the country. This part is divided into two main sections: the first section describes the general situation, and the second section describes the situation in the various regions of the country. The first section is divided into three parts: the first part describes the general situation, the second part describes the situation in the various regions, and the third part describes the situation in the various districts of the country. The second section is divided into two parts: the first part describes the situation in the various regions, and the second part describes the situation in the various districts of the country. The first part of the report is the most important, and it is the most difficult to write. It is the most important because it is the first part of the report, and it is the most difficult to write because it is the most important part of the report.

REPORT ON THE 1990-1991 SEASON

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain on *Agrobacterium* strain. The transformation efficiency of *Agrobacterium* strain on *Agrobacterium* strain was determined by the number of transformants per 10⁶ cells. The results are shown as the mean \pm SD of three independent experiments. The transformation efficiency of *Agrobacterium* strain on *Agrobacterium* strain was significantly higher than that of *Agrobacterium* strain on *Agrobacterium* strain ($p < 0.05$).

1. The first group of people who are interested in the results of the study are the researchers themselves. They want to know if the study was successful in achieving its objectives and if the results are consistent with their expectations. They also want to know if the study has contributed to the field of research and if it has provided any new insights or information.

1. The first part of the report, which is the most important, is the description of the situation in the country. This part should be written in a clear and concise manner, and should be based on the most reliable information available. It should include a description of the political, economic, and social situation, and should also include a description of the military situation. The second part of the report is the analysis of the situation. This part should be written in a clear and concise manner, and should be based on the most reliable information available. It should include an analysis of the political, economic, and social situation, and should also include an analysis of the military situation. The third part of the report is the conclusion. This part should be written in a clear and concise manner, and should be based on the most reliable information available. It should include a conclusion about the political, economic, and social situation, and should also include a conclusion about the military situation.
