Subject: Form C-103

New Mexico Oil Conservation Commission
P. O. Box 2045
Hobbs, New Mexico

Gentlemen:

As was pointed out in your letter of January 7, there were some discrepancies in the subject forms submitted for our State B-1 and State C-1 in the Eumont Field. These forms were in error in both cases by stating that the wells were currently producing gas.

Shell State C-1 in Section 24, T-19-S, R-36-E is producing gas from the Queen as a single zone recompletion and, as such, is not subject to a packer leakage test. State B-1 of Section 29, T-21-S, R-36-E and State C-1 of Section 24, ~~T-21-S, R-35-E~~ are both completely nonproducing and temporarily abandoned. The correct forms for both of these wells are attached to this letter.

Yours very truly,

P. A. Dennie
Division Production Manager
