Shell Oil Co.  
Box 845  
Roswell, New Mexico

Gentlemen:

We are returning all copies of Form C-103 for your State "B" No. 1 in Unit D of Section 29, T-21-S, R-36-E for clarification. This form shows the well to be a dual completion in the Eumont Gas and Monument Oil Pools, whereas our records show it to be a single completion as an oil well in the Eumont Pool.

Further, our records indicate that a Packer Leakage Test for the year 1959 has not been filed for your State "C" No. 1 in Unit A of Section 24, T-21-S, R-35-E, which is producing gas from the Queen sand in the Eumont Pool with the oil zone in the Monument Pool temporarily abandoned. We shall appreciate your filing this report by January 30th.

Yours very truly,

OIL CONSERVATION COMMISSION

Eric F. Engbrecht  
Engineer, District 1
