

This well is to be drilled as a tubingless completion and will conform with the requirements of OCC Rule 107(e), as follows:

1. The proposed total depth is less than 5,000'.
2. The well is not a wildcat but will serve to extend the Wilson Pool.
3. No unusual corrosion problems are anticipated. The BHP at 3,803' in Texaco's State of New Mexico "BZ" NCT-5 Well No. 1 is 1455 psi, a normal pressure at that depth.
4. This well is not to be dualled.
5. A string of 2-7/8" O.D. tubing is to be used in lieu of casing.

In view of this conformance to the provisions of Rule 107(e), it is respectfully requested that this well be approved for tubingless completion by the District Supervisor as permitted by this same rule.

These wells are to be drilled as a result of the
and this contract with the Department of the Interior
as follows:

1. The first well is to be drilled on the
2. The well is to be drilled on the
3. The well is to be drilled on the
