

squeeze cementing and various intervals were perforated from 2650 to 3598 opposite the Yates-Seven Rivers-Queen section. The Queen was stimulated with a 3000-gallon acid-frac treatment and the Yates-Seven Rivers with a 5000-gallon regular acid treatment, following which the well tested 2060 MCFPD absolute open flow as calculated from a four-point back pressure test completed on February 10, 1954.

Concerning the exception to Rule No. 2, we wish to state the following:

- (A) The unorthodox location was occasioned by the recompletion of the well previously drilled to another horizon.
- (B) All operators within a 1980' radius of the subject well have been furnished a copy of this application.

With regard to the exception to Rule No. 5(a), we wish to state the following:

- (A) That the proposed non-standard gas proration unit, consisting of the south 320 acres of the E/2 Section 2, T-21-S, R-36-E, is composed of contiguous quarter-quarter sections.
- (B) That the proposed non-standard gas proration unit lies wholly within a single governmental section.
- (C) That the entire proposed non-standard gas proration unit may reasonably be presumed to be productive of gas.
- (D) That the length or width of the proposed non-standard gas proration unit does not exceed 5280'.
- (E) That the entire proposed non-standard gas proration unit lies within the horizontal limits of the Mumont Gas Pool.
- (F) That by copy of this letter of application all operators owning interest in the section in which the non-standard gas proration unit is situated and which acreage is not included in said non-standard gas proration unit and all operators owning interest within 1500' of the well have been notified by registered mail of this application.

Yours very truly,

Ralph L. Hendrickson
Ralph L. Hendrickson
Field Superintendent
