DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Production from this well has declined to 35 barrels oil and 30 barrels water per day.

Permission is requested to acidize the interval 3716 to 3871' with 1,000 gallons acid in an attempt to increase the daily oil production from this well.

A subsequent report after acidization will be submitted.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
