(State or Territory)

The elevation of the derrick floor above sea level is 3545 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Meyer B-4 No. 15 is presently producing 10 barrels of oil and 3% water per day by gas lift. In accordance with Mr. E. L. Shafer's telephone conversation with Mr. Don Russell of the U. S. Geological Survey, it is proposed to treat the subject well in open hole from 3727' to 3857' with 3000 gallons acid.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
