

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	9-5/8"	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Hobbs, New Mexico.

December 23rd, 1935.

Place

Date

OIL CONSERVATION COMMISSION,
 Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the _____

Gypsy Oil Company **Bell-Ramsay** Well No. **7** in the
 Company or Operator Lease
NW/4 of Sec. **4**, T. **21s**, R. **36e**, N. M. P. M.,
Eunice Field, **Lea** County.

The dates of this work were as follows: **Cemented 12-17-35** **Tested 12-20-35**

Notice of intention to do the work was [~~was~~] submitted on Form C-102 on **12-18-35** 19____
 and approval of the proposed plan was [~~was~~] obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The hole was washed down, the pipe tested with 1200# Pressure applied for 30 Min, the plug drilled and the hole tested with 1200# pressure applied for 30 Min. Both tests were Okeh and approved by Mr. Vesely State Oil & Gas Inspector.

Witnessed by _____ Name _____ Company _____ Title _____

Subscribed and sworn to before me this **30**

day of **Dec.**, 19 **35**

Patricia Mahoney
 Notary Public

My Commission expires **Oct. 24 1935**

I hereby swear or affirm that the information given above is true and correct.

Name **P. J. Mahoney**

Position **District Superintendent**

Representing **Gypsy Oil Company**
 Company or Operator

Address **Hobbs, New Mexico.**

Remarks:

Name

Title

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt.$$

It is shown that the function $f(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $f'(x) = \frac{1}{1+x^2}$. It is also shown that the function $f(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(0, \frac{\pi}{2})$.

2. The second part of the paper is devoted to the study of the properties of the function $g(x)$ defined by the equation

$$g(x) = \int_0^x \frac{t}{1+t^2} dt.$$

It is shown that the function $g(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $g'(x) = \frac{x}{1+x^2}$.

It is also shown that the function $g(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(-\frac{\pi}{4}, \frac{\pi}{4})$.

3. The third part of the paper is devoted to the study of the properties of the function $h(x)$ defined by the equation

$$h(x) = \int_0^x \frac{t^2}{1+t^2} dt.$$

It is shown that the function $h(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $h'(x) = \frac{x^2}{1+x^2}$.

It is also shown that the function $h(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(0, \frac{\pi}{2})$.

4. The fourth part of the paper is devoted to the study of the properties of the function $k(x)$ defined by the equation

$$k(x) = \int_0^x \frac{t^3}{1+t^2} dt.$$

It is shown that the function $k(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $k'(x) = \frac{x^3}{1+x^2}$.

It is also shown that the function $k(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(-\frac{\pi}{4}, \frac{\pi}{4})$.

5. The fifth part of the paper is devoted to the study of the properties of the function $l(x)$ defined by the equation

$$l(x) = \int_0^x \frac{t^4}{1+t^2} dt.$$

It is shown that the function $l(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $l'(x) = \frac{x^4}{1+x^2}$.

It is also shown that the function $l(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(0, \frac{\pi}{2})$.

6. The sixth part of the paper is devoted to the study of the properties of the function $m(x)$ defined by the equation

$$m(x) = \int_0^x \frac{t^5}{1+t^2} dt.$$

It is shown that the function $m(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $m'(x) = \frac{x^5}{1+x^2}$.

It is also shown that the function $m(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(-\frac{\pi}{4}, \frac{\pi}{4})$.

7. The seventh part of the paper is devoted to the study of the properties of the function $n(x)$ defined by the equation

$$n(x) = \int_0^x \frac{t^6}{1+t^2} dt.$$

It is shown that the function $n(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $n'(x) = \frac{x^6}{1+x^2}$.

It is also shown that the function $n(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(0, \frac{\pi}{2})$.

8. The eighth part of the paper is devoted to the study of the properties of the function $o(x)$ defined by the equation

$$o(x) = \int_0^x \frac{t^7}{1+t^2} dt.$$

It is shown that the function $o(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is found to be $o'(x) = \frac{x^7}{1+x^2}$.

It is also shown that the function $o(x)$ is bounded on the interval $(-\infty, \infty)$ and that its range is the interval $(-\frac{\pi}{4}, \frac{\pi}{4})$.

9. The ninth part of the paper is devoted to the study of the properties of the function $p(x)$ defined by the equation

$$p(x) = \int_0^x \frac{t^8}{1+t^2} dt.$$
