We propose to run an inner string of 5 1/2" flush joint liner to approximately 3615' inside the 7" casing and above the 5 1/2" liner now installed in the hole from 3645 to 3837' to repair a leak in the casing at approximately 1340'. Also we plan to attempt to cement between the 7" and 10 3/4" casing annulus to preclude any further difficulty from the upper Yates high pressure gas sand.
