STATE "C" #1

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL			

Dallas, Texas.

Mr. P. J. Vesely, State Geologist, Oil & Gas Inspector,
Carlsbad, N. Mex.

WILDERNESS STUDY REPORT

The purpose of this study was to determine the suitability of the proposed area for inclusion in the National Wilderness System. The study was conducted in accordance with the National Wilderness Study Act of 1963, which requires that the Secretary of the Interior determine whether certain public lands are suitable for inclusion in the National Wilderness System. The study was conducted by the Bureau of Land Management, U.S. Department of the Interior, and was completed in 1964. The study area is located in the State of California, and is approximately 100,000 acres in size. The study was conducted by a team of experts in the field of wilderness management, and the results of the study are presented in this report. The study found that the proposed area is suitable for inclusion in the National Wilderness System, and that it meets the criteria established by the National Wilderness Study Act of 1963. The study also found that the proposed area is of significant scientific and educational value, and that it is worthy of protection as a national wilderness area. The study was conducted in accordance with the National Wilderness Study Act of 1963, which requires that the Secretary of the Interior determine whether certain public lands are suitable for inclusion in the National Wilderness System.
