Mr. C. C. Cummings  
Gypsy Oil Company  
Hobbs, New Mexico

Dear Mr. Cummings:

This is in regard to the setting of the 5 $\frac{1}{2}$ " casing on your Crcutt State well #1.

According to my records this casing was set with 15 sacks of cement. As you no doubt know, the drilling regulations call for enough cement to bring it to the bottom of the next larger string unless a Bradenhead gas program was approved.

I am taking the matter up with Dr. C. H. Wells and the Oil Conservation Commission, and it may be necessary to perforate the casing and add the required amount of cement.

Very truly yours,

WJV:t

W. J. Vesely,  
State Oil & Gas Inspector.
