MIDLAND, TEXAS

DECEMBER 20th 1935

Place

Date

OIL CONSERVATION COMMISSION,

Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intent to do certain work as described below at the DEVONIAN OIL

**COMPANY** HEASLEY-STATE Well No. 2 in CEN LOT 2  
 Company or Operator  
 of Sec. 5, T. 21-S, R. 36-E, N. M. P. M., EUNICE Field,  
LEA County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Plan to set and cement with 200 sacks of cement 12½" 50 pound surface casing at approximately 270 feet. The size of the hole will be 17½" and to set casing at this point will call for approximately 250 feet of pipe. This string will be cemented by pump and plug method and will be allowed to stand at least 36 hours before drilling plug and bailing dry for a shut off test. This shut off test will be made on the afternoon of December 23rd 1935. Casing point will be through the first water sand and will be in red beds.

Approved \_\_\_\_\_, 19\_\_\_\_  
 except as follows:

 Position \_\_\_\_\_

Send communications regarding well to

Name DEVONIAN OIL COMPANYAddress BOX 278, MIDLAND, TEXAS.

# THEORY OF THE EARTH AND ITS HISTORY

The theory of the earth and its history is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features, and to determine the sequence of events which have taken place since the earth was first formed.

The theory of the earth and its history is based on the study of the rocks and the fossils which they contain. By examining the layers of rocks and the remains of plants and animals which they preserve, geologists can determine the order in which they were deposited, and the conditions under which they were formed. This enables them to reconstruct the history of the earth, and to understand the processes which have shaped it.

The theory of the earth and its history is a science which is constantly developing. As new discoveries are made, and as new methods of investigation are developed, our knowledge of the earth and its history is constantly increasing. This makes it a very exciting and interesting field of study.

## THE EARTH AND ITS HISTORY

The earth is a planet which is constantly changing. It is a planet which is shaped by the forces of nature, and which is the result of a long and complex process of development. The history of the earth is a story of change and development, and it is a story which is constantly being rewritten as new discoveries are made.
