## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Plan to set and cement with 500 sacks of cement approximately 1170 feet of new 9 5/8" 36 pound lapweld casing. Under Form #C-101 this was set out that 650 sacks of cement would be used. This was in error as 150 % to fill from the casing point to the surface would be 485 sacks. Size of hole out is 12 1/4" and the casing point will be in Anhydrite. The pump and plug method will be used and the job will be done by Halliburton. Expect to test shut off by pressure method sometime January 2nd.
