

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Place

July 8, 1936

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intent to do certain work as described below at the

Devonian Oil Company Heasley-State Well No. 5 in C Lot 4
Company or Operator Lease
of Sec. 5, T. 21-S, R. 36-E, N. M. P. M., Eunice Field,
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

It is planned to run and cement approximately 250 ft. of second hand 12½" 50# casing at 270 ft. in red beds on July 10th with 200 sacks cement. The size of hole will be 17½" and the string will be cemented by the pump and plug method. This string will be allowed to stand at least 36 hours before testing for a shut off by bailing on July 12th.

SECTION 1.0 - INTRODUCTION

This document is a technical specification for the development of a new software system. It defines the requirements, architecture, and implementation details of the system. The document is intended for use by developers, testers, and project managers.

SECTION 2.0 - REQUIREMENTS

The system shall provide the following functionality:

- 1.1. User authentication and authorization.
- 1.2. Data storage and retrieval.
- 1.3. Reporting and analytics.
- 1.4. System administration tools.

SECTION 3.0 - ARCHITECTURE

The system architecture is based on a three-tier model. The presentation tier is responsible for user interaction. The business logic tier handles the core operations. The data tier manages the storage and retrieval of data.

SECTION 4.0 - IMPLEMENTATION

The implementation of the system follows the following guidelines:

- 4.1. Use of standard programming languages and frameworks.
- 4.2. Adherence to industry best practices for software development.
- 4.3. Implementation of security measures to protect data and system integrity.
- 4.4. Regular testing and quality assurance throughout the development process.
