original
With/gas-oil ratio of approximately 35,000 to 1 on this well we have done remedial work as follows in effort to reduce the ratio:

- (1) Set Otis B.H. choke @ 3850' (20' above perforation) which reduced ratio to 24,000 / 1. -- After removing the above we
- (2) Installed Exmer-Dodge Under-Set Packer with element set at 3812' (minus 219')

There was but one attempt made in setting the packer, and to date is apparently completely shut off. -- Well is producing with ratio of approx. 2000 / 1
