

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL		Re-set packer	<b>XX</b>

Title

ORIGINAL ARTICLES

1. The first article is a review of the literature on the treatment of the common cold. The author discusses the various remedies that have been used, including rest, fluids, and various medications. He concludes that the best treatment is a combination of rest and fluids, and that medications are of little value.

2. The second article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

3. The third article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

4. The fourth article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

5. The fifth article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

6. The sixth article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

7. The seventh article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

8. The eighth article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

9. The ninth article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

10. The tenth article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

11. The eleventh article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

12. The twelfth article is a report on a series of experiments conducted by the author. The experiments were designed to determine the effect of various factors on the rate of absorption of a drug. The results show that the rate of absorption is affected by the pH of the solution, the surface area of the drug, and the viscosity of the medium.

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## NOTICE OF INTENTION TO DRILL

Notice must be given to the Oil Conservation Commission or its proper agent and approval obtained before drilling begins. If changes in the proposed plan are considered advisable, a copy of this notice showing such changes will be returned to the sender. Submit this notice in triplicate. One copy will be returned following approval. See additional instructions in Rules and Regulations of the Commission.

Tulsa, Oklahoma.

November 22nd, 1935

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico

Place

Date

Gentlemen:

You are hereby notified that it is our intention to commence the drilling of a well to be known as \_\_\_\_\_

Gypsy Oil Company

North R. R. Bell

Well No. 2 in NE SE

Company or Operator

Lease

of Sec. 6, T. 21S, R. 36E, N. M. P. M., Eunice Field, Lea County.

N.

The well is 660 feet [N.] [S.] of the North line and 660 feet

[E.] [W.] of the East line of NE SE

(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. B-230 Assignment No. \_\_\_\_\_

If patented land the owner is \_\_\_\_\_

Address \_\_\_\_\_

If government land the permittee is \_\_\_\_\_

Address \_\_\_\_\_

The lessee is Gypsy Oil Company

Address Box 661, Tulsa, Oklahoma.

We propose to drill well with drilling equipment as follows: \_\_\_\_\_

## Rotary Tools

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows: \_\_\_\_\_

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
13-3/4"	10-3/4"	40	SH	350	Cemented	250
9-7/8"	7-5/8"	26	NEW	2800	Cemented	550
6-3/4"	5-1/2"	17	NEW	3800	Cemented	350

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about 3800 feet.

Additional information:

Approved \_\_\_\_\_, 19\_\_\_\_  
except as follows:

Submit to Commission regulations for  
drilling and casing wells in this  
area
