OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

RECEIVED
MAY 3 1946
REGISTRY

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL		Install flow valves and connect outside gas from Eunice Gas System	XX

STATEMENT OF WORK

This document describes the work to be performed under the contract. It is intended to provide a clear understanding of the project goals, objectives, and deliverables. The work is to be completed by the contractor within the specified time frame and budget.

1.0 PROJECT OBJECTIVES

The primary objective of this project is to develop a comprehensive system for data analysis and reporting. The system should be able to handle large volumes of data and provide accurate and timely results.

1.1 Objectives

- 1.1.1 Develop a system architecture that is scalable and secure.
- 1.1.2 Implement data collection and storage mechanisms.
- 1.1.3 Develop data processing and analysis algorithms.
- 1.1.4 Create user-friendly interfaces for data entry and reporting.
- 1.1.5 Conduct testing and validation to ensure system reliability.

The system should be able to handle up to 10,000 records per day and provide reports within 24 hours of data collection.

2.0 SCOPE OF WORK

2.1 Work to be performed

The contractor is responsible for the design, development, testing, and deployment of the system. This includes all hardware and software components necessary for the system to function.

The contractor will also provide training for the end users and ongoing support for the system after deployment.

The contractor is not responsible for the procurement of hardware or software licenses, unless otherwise specified in the contract.

The contractor will provide a detailed project plan and schedule to the client for review and approval.

The contractor will maintain regular communication with the client throughout the project to ensure that the system meets the client's requirements.

3.0 DELIVERABLES

The contractor will provide the following deliverables:

- 3.1 System architecture and design documents.
- 3.2 Source code for the system.
- 3.3 Test plans and test results.
- 3.4 User manuals and training materials.
- 3.5 Deployment and support documentation.

The contractor will provide a final report summarizing the project results and any recommendations for future work.

The contractor will provide a list of personnel who worked on the project, including their roles and responsibilities.

The contractor will provide a list of subcontractors used during the project, including their names and contact information.

The contractor will provide a list of vendors used during the project, including their names and contact information.

The contractor will provide a list of other resources used during the project, including their names and contact information.

The contractor will provide a list of other personnel who worked on the project, including their names and contact information.

The contractor will provide a list of other vendors used during the project, including their names and contact information.

The contractor will provide a list of other resources used during the project, including their names and contact information.

The contractor will provide a list of other personnel who worked on the project, including their names and contact information.

The contractor will provide a list of other vendors used during the project, including their names and contact information.

The contractor will provide a list of other resources used during the project, including their names and contact information.

The contractor will provide a list of other personnel who worked on the project, including their names and contact information.
