

Memo to File

Well Name: H. T. Orcutt (NCT-C) Com A #3
API Number: 30-025-04534
Coordinates: 1980' FNL & 1980' FEL
S - T - R: 6 - 21S - 36E Unit G
County / State: Lea, NM
Drilled: 1936

Operator: Chevron
Field: Eumont
Date: 7/31/01
By: DCD

Note: A review of Chevron's workover files indicated that the 75/8" x 51/2" annulus was cemented to the surface when it was squeezed at 1130'. Work was done in February, 1979.

The attached P&A procedure differs greatly from that originally submitted by Chevron or the one discussed in our meeting of 8/14/01. Since the 51/2" csg can not be pulled, this led us to propose that the 103/4" x 75/8" annulus be cemented and the 51/2" be left filled with cement. ZONITE highly compressed sodium bentonite nodules will still be used for the bottom plug and across the Rustler and 75/8" csg shoe.
