The elevation of the derrick floor above sea level is 3577 ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The production from Mayer B-9 No. 1 has declined to approximately 8 barrels oil per day.

It is therefore proposed to treat the subject well in open hole from 3769 to 3900' with 3000 gallons acid, in accordance with Mr. D. F. Jacob's telephone conversation with Mr. Don Russell.

**ILLEGIBLE**

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
