

N MEXICO OIL CONSERVATION C MISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL REPORT ON RESULT OF TEST OF CASING SHUT-OFF REPORT ON RESULT OF PLUGGING OF WELL	REPORT ON REPAIRING WELL REPORT ON PULLING OR OTHERWISE ALTERING CASING REPORT ON DEEPENING WELL

1. How did the author's research on the history of the word "gay" lead to the discovery of the "gay" in "gay and straight"?
 2. What is the significance of the word "gay" in the context of the author's research? How does it relate to the history of the word?
 3. How does the author's research on the history of the word "gay" relate to the history of the word "straight"?
 4. What is the author's argument about the relationship between the words "gay" and "straight"?
 5. How does the author's research on the history of the word "gay" relate to the history of the word "straight"?

... .. to study physical

1. *What is the purpose of the study?*
 The purpose of the study is to investigate the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course.

2. *What are the research questions?*
 The research questions are: (1) What is the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course? (2) What are the factors that influence the use of a mobile learning application?

3. *What is the significance of the study?*
 The significance of the study is that it provides information about the effectiveness of mobile learning applications in improving learning outcomes, which can be used by educators and researchers to develop more effective learning strategies.

4. *What are the limitations of the study?*
 The limitations of the study are that the sample size is small and the study is limited to a specific mathematics course, which may limit the generalizability of the findings.

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to determine what consumers want and what is currently available. Once a need is identified, the next step is to develop a concept that addresses this need. This is often done through brainstorming sessions and the creation of a product prototype. The third step is to conduct a feasibility study to assess the viability of the product. This involves evaluating the costs of production, the potential for sales, and the competitive landscape. If the study is positive, the next step is to develop a business plan that outlines the marketing and financial strategies for the product. Finally, the product is launched into the market, and the company monitors its performance and makes adjustments as needed.

Figure 1. The proposed model for the development of the self-regulation of learning. The model illustrates the relationship between various factors influencing the development of self-regulation of learning. The central concept is 'Self-regulation of learning', which is influenced by 'Metacognitive skills', 'Motivation', and 'Social support'. 'Metacognitive skills' are further influenced by 'Metacognitive knowledge' and 'Metacognitive strategies'. 'Motivation' is influenced by 'Intrinsic motivation' and 'Extrinsic motivation'. 'Social support' is influenced by 'Social support from peers' and 'Social support from teachers'. The model also shows that 'Metacognitive skills', 'Motivation', and 'Social support' all contribute to the development of 'Self-regulation of learning'.
