

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL

Oil & Gas Inspector
Title

1. The first step in the process of identifying and assessing the risks of a project is to identify the potential risks. This involves a thorough review of the project's objectives, scope, and resources. The next step is to assess the risks, which involves determining the likelihood and potential impact of each risk. This is typically done using a risk matrix, which rates risks based on their severity and frequency. Once the risks have been identified and assessed, the next step is to develop a risk management plan. This plan should outline the steps that will be taken to avoid, minimize, or transfer the risks. Finally, the risks should be monitored and controlled throughout the project. This involves regularly reviewing the project's progress and adjusting the risk management plan as needed.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses in all cases. Error bars represent the standard error of the mean.
