HUMBLE OIL & REFINING COMPANY

Oil Conservation Commission

-2-

January 3, 1955

4. The length or width of the non-standard gas proration unit does not exceed 5280 feet.
5. Humble Oil & Refining Company has full interest in proposed non-standard gas proration unit and there are no offset operators owning interests within 1500 feet of the well to which such gas proration unit is proposed to be allocated.

In view of the above facts, it is our understanding that you can approve a 320-acre non-standard proration unit for this well by the same authority that you approved the 160-acre unit. We trust you will find the information submitted in order.

Yours very truly,

HUMBLE OIL & REFINING COMPANY

J. V. MOORE,
Division Superintendent

Oil Conservation Commission

1. The length or width of the non-standard gas, petroleum unit does not exceed 2500 feet.

2. Humble Oil & Refining Company has this interest in proposed non-standard gas operation unit and there are no other operators having interests within 1000 feet of the well to which such gas operation unit is proposed to be allocated.

In view of the above facts, it is recommended that you can approve the non-standard operation unit for this well by the same authority that you approved the 1000-acre unit. We trust you will find this information submitted in order.

Yours very truly,

HUMBLE OIL & REFINING COMPANY

J. W. HOUSH,
Division Superintendent
