

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

MISCELLANEOUS REPORTS ON WELLS

The following reports were received from various sources during the year 1911, and are being published for the information of the Bureau and the public. The reports are arranged in alphabetical order of the names of the persons or organizations from whom they were received.

Reports received from various sources

Report of the United States Geological Survey, Washington, D. C., on the water resources of the United States, published in 1911. The report is a comprehensive study of the water resources of the United States, and is one of the most important works on the subject. It contains a detailed description of the water resources of the United States, and a discussion of the problems connected with their development and conservation. The report is divided into two parts, the first of which deals with the water resources of the United States, and the second of which deals with the problems connected with their development and conservation. The report is a valuable work, and is one of the most important contributions to the study of the water resources of the United States.
