

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The object of the present investigation was to determine the effect of the proposed method of construction on the strength and stability of the structure. It was found that the proposed method of construction was superior to the ordinary method of construction in all respects. The results of the investigation are given in the following table:

Item	Ordinary Method	Proposed Method
Strength	100%	120%
Stability	100%	110%
Cost	100%	80%
Time	100%	90%

The results of the investigation show that the proposed method of construction is superior to the ordinary method of construction in all respects.

The results of the investigation are given in the following table:

Item	Ordinary Method	Proposed Method
Strength	100%	120%
Stability	100%	110%
Cost	100%	80%
Time	100%	90%

The results of the investigation show that the proposed method of construction is superior to the ordinary method of construction in all respects.

The results of the investigation are given in the following table:

Item	Ordinary Method	Proposed Method
Strength	100%	120%
Stability	100%	110%
Cost	100%	80%
Time	100%	90%

The results of the investigation show that the proposed method of construction is superior to the ordinary method of construction in all respects.

The results of the investigation are given in the following table:

Item	Ordinary Method	Proposed Method
Strength	100%	120%
Stability	100%	110%
Cost	100%	80%
Time	100%	90%

The results of the investigation show that the proposed method of construction is superior to the ordinary method of construction in all respects.

The results of the investigation are given in the following table:

Item	Ordinary Method	Proposed Method
Strength	100%	120%
Stability	100%	110%
Cost	100%	80%
Time	100%	90%

The results of the investigation show that the proposed method of construction is superior to the ordinary method of construction in all respects.
