

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

THEORY OF THE EARTH AND ITS HISTORY

BY J. H. MACLEOD

WITH ILLUSTRATIONS BY J. H. MACLEOD

The theory of the earth and its history is a subject of great interest and importance. It is one of the most fundamental of the sciences, and it is one of the most difficult to teach. The student who wishes to understand the earth and its history must first of all understand the principles of geology. He must know the different rocks and minerals, and he must know how they are formed. He must also know the different periods of geological time, and he must know the events which have taken place during each of these periods. Only by a thorough knowledge of these things can the student hope to understand the theory of the earth and its history.

THE EARTH AND ITS HISTORY

11

The earth is a planet, and it is one of the most interesting of the planets. It is the only planet in our solar system which has a solid surface, and it is the only planet which has a large body of water on its surface. It is also the only planet which has a large number of living organisms on its surface.
