Total Depth 7145 Line. This well was deepened to 7145 from 3858' to test the Drinkard Pay, which we found non-productive. We now plan to plug back with cement from total depth to 6845' and then place 300' cement plug from 5400 to 5800' to protect the Holt Section. We then propose to plug back from 4300' to old total depth of 3858' and then try to re-complete this well in the regular Eunice-Monument pay section, at an approximate total depth of 3900'.
