The elevation of the derrick floor above sea level is 3576 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Lockhart B-14 No. 1 is presently producing 3 barrels of oil and 15 barrels of water per day. In an effort to increase oil production it is proposed to acidize the open hole from 3864 to 3870' with 2000 gallons.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
