# THEORY OF THE EARTH

## CHAPTER I. OF THE ORIGIN OF THE EARTH.

The origin of the earth is a subject which has occupied the minds of philosophers from the earliest ages. Some have supposed it to have been created in a single instant, and others to have been the result of a long and gradual process. The former opinion is supported by the sacred writers, and the latter by the philosophers. The former opinion is also supported by the fact, that the earth is now in a state of decay, and is therefore supposed to have been created in a perfect state. The latter opinion is supported by the fact, that the earth is now in a state of decay, and is therefore supposed to have been created in a perfect state.

### SECTION I. OF THE ORIGIN OF THE EARTH.

The origin of the earth is a subject which has occupied the minds of philosophers from the earliest ages. Some have supposed it to have been created in a single instant, and others to have been the result of a long and gradual process. The former opinion is supported by the sacred writers, and the latter by the philosophers. The former opinion is also supported by the fact, that the earth is now in a state of decay, and is therefore supposed to have been created in a perfect state. The latter opinion is supported by the fact, that the earth is now in a state of decay, and is therefore supposed to have been created in a perfect state.

### SECTION II. OF THE ORIGIN OF THE EARTH.
