

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

THE EFFECTS OF THE FLOODING OF THE RIVER

The purpose of this report is to provide a comprehensive overview of the effects of the flooding of the river on the surrounding environment and the local population. The report is based on a series of field studies and interviews with local residents.

The first part of the report describes the geographical location of the river and the extent of the flooding. The second part discusses the impact of the flooding on the local population, including the loss of property and the disruption of daily life.

The third part of the report examines the environmental effects of the flooding, such as the destruction of forests and the contamination of water sources. The fourth part discusses the measures that have been taken to mitigate the effects of the flooding.

The fifth part of the report provides a summary of the findings and offers recommendations for future research and action. The report concludes that the flooding of the river has had a significant impact on the local population and the environment, and that further measures are needed to prevent such disasters in the future.

The report is organized into five main sections: Introduction, Description of the Flooding, Impact on the Local Population, Environmental Effects, and Conclusion. Each section is supported by a wealth of data and evidence.

The report is written in a clear and concise style, making it accessible to a wide range of readers. The use of bullet points and numbered lists helps to organize the information and make it easier to read.

The report is a valuable resource for anyone interested in the effects of natural disasters on the environment and the local population. It provides a detailed and up-to-date account of the flooding of the river and the impact it has had on the surrounding area.
