# THE HISTORY OF THE CITY OF NEW YORK FROM 1624 TO 1898

The history of the city of New York, from its first settlement in 1624 to the present time, is a story of growth and development. It is a story of the struggles and triumphs of a people who have built a great city out of a small fishing village. The city has been the center of commerce and industry, of science and art, of politics and religion. It has been the home of many of the great men of the world, and it has been the stage for many of the great events of history.
