MISCELLANEOUS REPORTS ON WELLS

It is the policy of the State Geologist to have all reports on wells checked by the State Geologist or his assistants before they are published. The purpose of this check is to insure that the reports are accurate and that they contain no information that is confidential or proprietary. The State Geologist or his assistants will check the reports for accuracy and for the presence of confidential or proprietary information. If the reports are found to be accurate and do not contain confidential or proprietary information, they will be published. If the reports are found to be inaccurate or contain confidential or proprietary information, they will be corrected or the confidential or proprietary information will be removed before they are published.
