## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Due to the present scarcity of pipe, the following changes are proposed:

Instead of running 9-5/8" casing to 1650', in a 12-1/4" hole, 10-3/4" casing will be run in a 14-1/2" hole to 240' and cemented with 240 sacks.

Two stages will be used in cementing the 7" casing in place of the one stage and sufficient cement used to circulate to surface. Two-hundred and seventy sacks will be run the first stage and 270 sacks cement the second stage through the 2-stage tool, set at approximately 1400'. The 7" casing will be set at 3050'.
