Lockhart 1-18
Well No. 2 is located 660 ft. from NX line and 1980 ft. from E line of sec. 18

SW/4 SE/4 Sec. 18 21-3 36-3 101PM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
N4FU Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3625 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Production history and offset information definitely establish the original open hole completion interval as being watered out. No recompletion possibilities exist and all recoverable oil reserves have been depleted.

Permission is requested to plug and abandon the subject well in the following manner:

1. Load hole with mud.
2. Spot 20 sack cement plug at 3780'.
3. Set 20 sack cement plug at surface & erect marker.
4. Clean & clear location.

All casing will be left in the hole.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
