Wells A-1
Well No. 6 is located 600 ft. from [N] line and 1800 ft. from [E] line of sec. 18
N4/4 NE/4 Sec. 18 21-5 10-4 N47W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
NMPU Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Previous remedial work and offset information definitely establish the original open hole completion interval and the first recompletion interval as being watered out. No recompletion possibilities exist and all recoverable oil reserves has been depleted.

Permission is requested to plug and abandon the subject well in the following manner:

1. Load hole with mud.
2. Spot 20 sack cement plug at 3700'.
3. Set 10 sack cement plug at surface and erect marker.
4. Clean and clear location.

All casing will be left in the hole.

A subsequent report will be filed upon completion of this work.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company
