Mr. Warren Mankin
New Mexico Oil Conservation Commission
State Capitol
Santa Fe, New Mexico

Dear Mr. Mankin:

During the past two weeks a number of applications for administrative approval of non-standard units and dual completion of wells, in Lea County, New Mexico, have been filed with the Commission.

This is to request that in the event it is thought necessary to deny administrative approval and set any of these applications for hearing, that they be set for examiner hearing in Hobbs. If possible it would be appreciated that they be set on the same date as Continental's other applications for examiner hearing.

This request is particularly directed, but not necessarily limited to the application for administrative approval of dual completion and non-standard unit for the Meyer B-17 Well No. 1, Sec. 17-21s-36e.

Your consideration of this request will be appreciated.

Yours very truly,

Jason
