

NE MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF	<input checked="" type="checkbox"/>	NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL

Place

Date

OIL CONSERVATION COMMISSION,

Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Repollo Oil Company State Loc. #176

Well No. 3 in W/2

Company or Operator

21S

Lease # 36E

of Sec. 19, T.

R.

N. M. P. M.,

Field,

Lea

County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Set 3883' of 7" OD 24# Seamless casing on January 11th at 3893'. This was a two stage job. 125 sacks common cement used above & 200 sacks below. (Halliburton job)

Approved _____, 19____

except as follows:

Repollo Oil Company

Company or Operator

By

Position

L. S. Surratt
Dist. Superintendent

Title

It is well known that the "standard" definition of a function is: a set of ordered pairs (x, y) such that for every x there is exactly one y such that (x, y) is in the set. This definition is based on the set-theoretic notion of a function. However, in the context of the theory of computation, it is often more convenient to define a function in terms of a Turing machine. A Turing machine is a mathematical model of computation that consists of a tape, a head, and a set of states. The head moves along the tape, reading and writing symbols, and the states represent the internal configuration of the machine. A function is then defined as a mapping from inputs to outputs that can be computed by a Turing machine. This definition is more general than the set-theoretic one, as it allows for the possibility of non-terminating computations. In the context of the theory of computation, a function is often referred to as a "computable function" or a "recursive function".
