17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

First quarter of 1969 production from this well averaged 4 BOPD plus 90% water. A plugback and acid job in May, 1969 failed and well is producing 100% water. No other remedial possibilities exist. We propose to plug and abandon by setting a cast iron bridge plug at approximately 3810' and capping same w/10 sx of cement. 10 sx of cement to be placed in top of well and regulation dry hole marker erected. Location will be cleared and levelled. All casing strings will remain intact. Work will start about 10/1/69.

Use mud

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
