Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the Gulf Oil Corporation

Gypsy Production Division Arnott-Ramsay "G" Well No. _____ in _____
Company or Operator Lease

of Sec. 21, T. 21S, R. 36E, N. M. P. M., Lincoln Field,
County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

At present the lease produces oil into three tank batteries. Tank battery No. 3 provides storage for wells 6, 7, and 11 and consists of 1925 bbls of tank room. Tank Battery No. 1 provides storage for wells 1, 2, 13, and 14 and has a capacity of 1250 barrels. Tank battery No. 2 consists of 2500 barrels of storage and provides producing capacity for wells 3, 4, 5, 8, 9, 10, and 12. Tank batteries 1 and 2 are within the same fire wall.

It is proposed to consolidate all producing wells into one tank battery and install overflow lines on the tanks. In this consolidation 4325 barrels of storage would be available for the 14 producing wells.

This plan is requested in order to salvage much needed material and to simplify treating and producing facilities.

Approved _____, 19____
