Gentlemen:

The above mentioned well was shut-in on December 31, 1987, for being overproduced by six times its allowable. The lease agreement on this well does not have a shut-in provision and must be produced at least five days per month. We request your permission to produce the well at a reduced rate of approximately 60 MCF per day for five days a month in order to fulfill our lease obligation.

Very truly yours,

J. L. MUNGLE
District Administrative Supervisor
