Subject: Application for Exception  
 to Rule 5 (a), Order No. R-520,  
 Pan American Petroleum Corporation's  
 State "I" No. 2, Eumont Field

Mr. A. L. Porter, Jr. (3)  
 New Mexico Oil Conservation Commission  
 P. O. Box 871  
 Santa Fe, New Mexico

Dear Sir:

Under the provisions of Commission Order R-520, Rule 5 (b), Special Rules and Regulations for the Eumont Gas Pool, delegating the Secretary of the Commission authority to grant exceptions to the requirements of Rule No. 5 (a) without notice and hearing for a non-standard gas proration unit, Pan American Petroleum Corporation hereby applies for an exception to the aforementioned rule for State "I" Well No. 2, Eumont Field.

In support of the above application, the following data are furnished:

1. The application is submitted in triplicate.
2. The proposed non-standard gas proration unit of 160 contiguous acres consists of the NW/4 Section 22, T-21-S, R-36-E.
3. Exact name and location of well involved:  
 State "I" No. 2, located 660' from the North line and 1980' from the West line Section 22, T-21-S, R-36-E, NMPL, Lea County, New Mexico.
4. The proposed non-standard gas proration unit lies wholly within a single governmental section.
5. The entire proposed non-standard gas proration unit may reasonably be presumed to be productive of gas.
6. The length or width of the proposed non-standard gas proration unit does not exceed 5280'.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves determining whether the problem has been solved and whether the resources have been used effectively.
