Re: Application for Exception te No-Flare Order R-553

Oil Conservation Commission State of New Mexico Santa Fe, New Mexico

Gentlemen:

Gulf Oil Corporation respectfully requests that the Oil Conservation Commission grant an exception to No-Flare Order R-553 as it pertains to Gulf's Harry Leonard "J" Well No. 1 and in support thereof states the following facts:

> The Harry Leonard *J" Well No. 1 is located 1980' from the north and east lines of Section 24, T21S, R36E, Lea County, New Maxico, and was completed August 6, 1956, in the Arrowhead Pool. The well produced at the rate of 46 barrels of oil per day with a gas-oil ratio of 3528 cubic feet per barrel and an oil allowable of 39 barrels per calendar day was assigned to the well.

The well is located approximately 1-1/2 miles from the nearest low pressure gathering system and there is an insufficient volume of gas in the immediate vicinity of the well to equally justify the cost of a gathering system extension to connect the gas at this time; however, we will endeavor to find a market for the gas as seen as possible.

In view of the foregoing and to keep the well on production and thereby protect correlative rights, it is requested that the Oil Conservation Commission issue an exception to its No-Flare Order R-553 with respect to a volume of approximately 137 MCF per day of low pressure casinghead gas which will be vented from Gulf's Harry Leonard "J" Well No. 1.

Yours very truly,

B. E. THOMPSON
