FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well was completed October 31, 1944 at a total depth of 3855' in the Grayburg formation as an oil well. It has been temporarily abandoned since February, 1945 due to its inability to produce oil. We propose to set a Baker cement retainer at 3736 feet, or 10 feet above the casing shoe, and plug off the exposed formation below with 50 sacks of cement. We then propose to let perforate with 2 holes per foot the Penrose section from 3720' to 3630' and the Knight section from 3580' to 3530' in an effort to develop commercial gas production from this well. Work will begin immediately on approval.

The 160 acres designated for this gas well is the NW 1/4 of Sect. 25, Township 21 S, Range 36 E.
