Re: Application to Dually Complete Gulf
Oil Corporation's W. A. Ramsay No. 15,
Eumont Gas and Eumont Oil Pools,
Lea County, New Mexico.

Gentlemen:

By this letter of application, Gulf Oil Corporation wishes to state the following:

(a) That Gulf Oil Corporation's W. A. Ramsay No. 15, located in the C SE/4 NW/4 of Section 27-21S-36E, will be projected to an approximate depth of 3900'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation's W. A. Ramsay Lease together with the location of all offset wells. The attached Exhibit "B" is a schematic drawing of the proposed dual completion.

(b) That subject well will have 5½" casing set at approximately 3800' and cemented with sufficient cement to isolate the salt section. The well is to be an oil well producing from the open hole interval from 3800-3900' in the Queen formation in the Eumont Oil Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

1. Perforate the 5½" casing within the approximate interval of 3100-3300' in the Yates and Seven Rivers formations in the Eumont Gas Pool.
2. Set production type packer below these perforations at approximately 3750' to separate the two pay zones.
3. Produce the Eumont Pool oil through the tubing and the Eumont gas through the tubing-casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Eumont and oil from the Eumont is in the interest of conservation and the protection of correlative rights.
