13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is requested that the temporary abandonment approval for this well be renewed for another year based on the last successful casing integrity test in 1/2/91.

The lower, oil producing, intervals in the Eumont Pool have been depleted in this wellbore. Recent remedial work in this area has indicated that there may be potentially gas productive intervals in the Seven Rivers formation that have not yet been completed. It is requested that this well be retained as temporary abandoned so that this potential can be evaluated and tested within the next year, 1996.
