

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

The first of these is the fact that the human race is not a homogeneous mass, but is composed of many distinct groups, each with its own characteristics and customs. These groups are known as races, and they are distinguished from one another by their physical and mental qualities. The second fact is that the human race has a long and varied history, and that its development has been influenced by many factors, including environment, climate, and social conditions. The third fact is that the human race is constantly changing, and that its future is uncertain. These facts are the basis of the study of anthropology, and they are the subjects of the following chapters.

The first chapter deals with the physical characteristics of the human race, and the second chapter deals with the mental characteristics. The third chapter deals with the history of the human race, and the fourth chapter deals with the development of the human race. The fifth chapter deals with the future of the human race, and the sixth chapter deals with the conclusion of the study.

The study of anthropology is a branch of science which deals with the human race, and its development. It is a branch of science which is concerned with the physical and mental characteristics of the human race, and with the history and development of the human race. The study of anthropology is a branch of science which is concerned with the human race, and its development.
