CONTINENTAL OIL COMPANY  
Lockhart A-30 #5 (K-30-F1-36)  
(60-411)

On April 20, 1961, at 8:00 A. M., the Continental Oil Company's Lockhart A-30 #5 well was switched from the Jal High Pressure Gathering System to the suction of a high pressure portable field compressor due to its inability to produce minimum contract requirements.
