

NEW MEXICO STATE LAND O. ICE
OFFICE OF THE STATE GEOLOGIST
SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL

UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF PLANT INDUSTRY
WASHINGTON, D. C.

ANNUAL REPORT OF THE BUREAU OF PLANT INDUSTRY

The Bureau of Plant Industry, United States Department of Agriculture, was organized on July 1, 1918, by the transfer of the plant industry functions of the United States Forest Service to the Department of Agriculture. The Bureau is now a part of the United States Department of Agriculture, and its functions are to conduct research in plant pathology, plant physiology, and plant breeding, and to disseminate the results of such research to the public.

The Bureau is organized into three main divisions: the Division of Plant Pathology, the Division of Plant Physiology, and the Division of Plant Breeding. The Division of Plant Pathology is concerned with the study of plant diseases and the methods of their control. The Division of Plant Physiology is concerned with the study of the functions of plants, and the Division of Plant Breeding is concerned with the study of the methods of improving plants by selective breeding.

The Bureau has a staff of about 100 persons, and its annual budget is about \$1,000,000. The Bureau has a number of field stations, and it also maintains a large collection of plant specimens. The Bureau is one of the leading research organizations in the United States, and its work has been of great value to the public.

The Bureau of Plant Industry is a part of the United States Department of Agriculture, and its functions are to conduct research in plant pathology, plant physiology, and plant breeding, and to disseminate the results of such research to the public.
