

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in TRIPLICATE to the District Office, Oil Conservation Commission, within 10 days after the work specified is completed. It should be signed and filed as a report on Beginning Drilling Operations, Results of test of casing shut-off, result of plugging of well, result of well repair, and other important operations, even though the work was witnessed by an agent of the Commission. See additional instructions in the Rules and Regulations of the Commission.

Following is a report on the work done and the results obtained under the heading noted above at the

Late Oil Company
(Company or Operator)

J. K. Reeter
(Lease)

Cactus Drilling Company
(Contractor)

Well No. 2 in the SE 1/4 NE 1/4 of Sec. 31

T. 21, R. 36, NMPM, So. Eunice Pool, Lea County.

The Dates of this work were as follows: 1-30-54

Notice of intention to do the work (was) (was not) submitted on Form C-102 on _____, 19____,
(Cross out incorrect words)

and approval of the proposed plan (was) (was not) obtained.

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

This well was drilled to a total depth of 3840', encountering a small amount of gas along with considerable water. Several attempts to squeeze off, using a formation packer, failed to develop a producer. The hole was then plugged to the casing point with cement and lead wool, and the Seven Rivers section between 3736 to 3742 was tested by perforating the 7" casing and rendering acid treatment. Being unable to develop a producing well in the Seven Rivers section, the hole was then plugged, cementing from 3757' to 3682' with 15 sacks and filling the hole with mud laden fluid from 3682' to 1620' and with cement from 1620' back to 1570' and mud laden fluid back to 60' and the top 60' of hole filled with cement and marker set, in accordance with rules and regulations. This work was completed January 30, 1954. There was no casing pulled from well.
